## FOR IMMEDIATE RELEASE

### **Buckingham Township Earns Bird Town Pennsylvania Certification**

Buckingham Township is proud to announce its designation as the **84th Bird Town in Pennsylvania**, a significant achievement in the Township's ongoing commitment to sustainability and environmental stewardship.

This certification was made possible through the collaborative efforts of **Diane Smith & Jim Walters**, Co-Chairs of Buckingham **Environmental Advisory Commission (EAC)**, and **Brittany Clark**, the Township's **Special Projects Coordinator**.

The **Bird Town resolution**, passed at the **March Board of Supervisors Meeting**, reinforces Buckingham Township's dedication to ecological initiatives aimed at increasing "green" living, promoting a culture of conservation within the community, and generating positive environmental outcomes.

Bird Town Pennsylvania is a partnership initiative led by the **Audubon Society**, designed to support municipalities in creating healthier, more sustainable communities for birds, wildlife, and people alike.

Buckingham Township looks forward to continuing its efforts in conservation and sustainability and invites residents to participate in programs and practices that support native wildlife and natural habitats.

For more information, please visit the **Sustainable Buckingham** page on the Township website.
